

DAVIDSTOW FARM **STANDARDS**

REVISED APPROVED **DAIRY CHEMICALS**

APRIL 15 - UPDATE 080415

Please note the following listing is not an exhaustive list.

Please confirm that all Dairy Chemicals (including own label products) used in the parlour, dairy or in footbaths do not contain QACs or Sodium dichloroisocyanurate ingredients.

Background:

Further to the initial list of Approved Dairy Chemicals forwarded previously, please see this updated listing which includes a more comprehensive range of approved products and dairy chemical stockists.

Please retain this for your records as a replacement for the previous edition.

In line with the Davidstow Farm Standards required from 1st April 2015 for all milk processed into the new product output from Davidstow, these include a requirement to only use approved dairy chemicals on farm, in the dairy, parlour and in footbaths.

Dairy chemicals containing Cyanuric Acids or QACs (Quaternary Ammonium Compounds) ingredients are prohibited for use on Davidstow farms from April '15.

Several dairy chemical market leaders currently contain these ingredients, so replacements will need to be selected. Please seek further advice from your Dairy Chemical supplier for future purchases.

Dairy Chemical Suppliers Listed

- **Agroserve**
- **Boumatic**
- **DeLaval**
- **Deosan Farm**
- **Ecolab**
- **Evans Vanodine**
- **GEA**
- **Genus ABS**
- **Kilco**
- **Kristal D&D**
- **Lely**
- **Progiene**
- **Quatcham**
- **Venture Dairy**
